

Tomasz Höfler is a Technical Sales Support Manager at Siemens Poland with over 10 years of experience in industrial automation, digitalization, and advanced engineering solutions. He leads a team of technical experts, supporting customers in the design and implementation of complex automation systems.

His expertise spans industrial control systems, PLC and HMI technologies, industrial networking, OT/IT connectivity, cybersecurity, and digital engineering platforms. In recent years, Tomasz has been particularly focused on the practical application of Artificial Intelligence in engineering workflows, including AI-assisted automation development, digital engineering tools, and the integration of AI technologies into industrial environments.

Combining deep technical knowledge with hands-on project experience, Tomasz works at the intersection of automation, cybersecurity, and AI, helping organizations accelerate digital transformation and improve engineering productivity.
